B. Administration and Problems:

Records Management Section - In the past week, the Agency filing system was installed in the Printing and Reproduction Division and approximately 50 cu. ft. of material was disposed of. 16 ft. of these records will be forwarded for storage in the Records Center and the remainder will be destroyed.

A tentative curriculum, a schedule and bulletin announcing the vital materials training program at the Repository for the Area Records Officers has been prepared. However, considerable additional work is going to be necessary.

Records Center Section - Services of three laborers, with the proper clearances, have been obtained to help in sorting and inventorying the JANIS material. It is anticipated that this job will be completed within the next week.

Mail Control Section - In spite of instructions to keep the rear gate of the mail trucks locked except at certain specified stations, there has been continued laxity on the part of the couriers to observe this rule. It has therefore become necessary to insist that the gate be locked and the key remain at "Q" Building, which will permit use of the rear gate for loading and unloading only at the Central Mail Room.

We are tentatively considering assignment of certain senior couriers as truck captains, in which case it may be possible to assign them the key and responsibility for seeing that the gates remain locked.
